

PVC curtains MOD CRTN are used for partitions on Industry, food storage, food preparation workshops, pallet trucks - forklifts entrances, refrigeration doors. They help to protect your space from dust, insects, odors, the difference of temperatures.

- Transparent PVC strip curtains very soft and resistant, especially for low temperatures, so that they don't get hard. With their installation they make a great barrier for small and large openings, from cold storage doors to large industrial hallways.
- Easy installation in 3'.
- Big saving of electrical energy up to 95%, with the opening of the cold room door. Easy operation of refrigeration machine without damages.
- Special reinforced suspension base Max Bullet from ABS with hooks, or Inox suspension base with hooks.
- Overlap of each strip 45 mm.
- Three different widths-thicknesses:
 - a. 200 mm x 2 mm
 - b. 300 mm x 3 mm and
 - c. 400 mm x 4 mm.
- Smooth surface or with ribbed stripes on both sides for bigger heights.
- They do not contain harmful plasticizers DOHP/DEHP FREE.
- Available also in insect repellent version.
- Every strip curtain exceeds the door opening by 10 cm in width and 8 cm in height.

SUSPENSION SYSTEMS

Clever and fast curtain mounting way with the american system Max Bullet. Strip change in 1'(minute) without tools

Inox curtain mounting system with hooks. Strip change from a technician with tools

Flexible PVC is a complex material made from different substances (PVC resins, plasticizers and additives) conferring its specific properties. The substances allowing its extra suppleness are plasticizers. A lot of different plasticizers are available, but about 80% of the worldwide consumption is comprised of three plasticizers: di-2-ethylhexyl phthalate (DEHP) also referred as di-octyl phthalate (DOP), di-isononyl phthalate (DINP) and di-isodecyl phthalate (DIDP). Those plasticizers, present in high quantity in flexible PVC strips and sheets (30 to 45% w.t.), have very different impacts on human health and environment.

✓ : Risks are not expected. X : There is a need to limit the risks.

Repr.Cat.2 R60-61:

REPROTOXIC - Risk Phrases

R60: May impair fertility / R61: May cause harm to the unborn child.

* Note: DINP & DIDP can be used in toys and childcare articles which can't be placed in mouth. Use of DEHP is restricted in all toys and childcare articles. (Precautionary measures - Directive 2005/84/EC - 14/12/2005)

AMP does not use any DEHP (DOP) plasticizers in its products. Such toxic and low quality plasticizers are often used in order to make more profits to the detriment of environment, human health and products durability. Such practices contribute to degrade PVC image in the public opinion instead that flexible PVC is a safe, environmental friendly, ecological, recyclable and durable product if made properly.

Our products are constructed in our modern facilities in Kryoneri Industrial Area, Athens, in compliance with German DIN standards of Berlin Technical University & HACCP specifications.
