

For the utilization of the cold room, we offer polypropylene cold storage shelves suitable for the humid environment of cold rooms, kitchens and warehouses. Our customers choose them because they are removable for easy washing in the washing machine.

The AMP SANITARY hygienic shelf is an ideal shelf for the pharmaceutical and hospital industry.

It is a fact that in pharmacies and hospitals special attention is paid to hygiene for obvious safety reasons. Shelving is an important part of clean rooms and cold rooms that need to be adapted to strict hygiene standards.

ANTIBACTERIAL SHELVES

The AMP sanitary shelves provide impeccable health safety due to the fact that it prevents the proliferation of bacteria, and has the effect of reducing the bacterial load, so that it can be used in any environment where it is important to have impeccable hygiene.

In addition to hospitals and pharmacies, AMP sanitary shelving is ideal for medical practices, beauty centres, dentists, nurseries, schools, restaurants, bakeries, public areas, swimming pools and saunas, fast food restaurants, canteens, the health sector, the military, grocery stores, and convenience and food stores.

Why choose antibacterial products?

The silver ion technology used in the production of sanitary shelving provides the products with continuous and lasting antimicrobial protection, which helps prevent the formation and growth of bacteria and mold on their surface. Microbes - bacteria, as well as mould and fungi - are found in any environment even on the cleanest surfaces.

Bacteria can multiply, sometimes to dangerous levels, and can lead to infections and disease. Bacteria create unpleasant odours, discolouration and deterioration, compromising hygiene levels. Consumers are looking for protection from bacteria present in all objects around us and their removal is not always possible through standard hygiene measures or disinfectants.

They are detachable, very reinforced so any surface:

Can take small and large loads, up to 150kg per surface.

To be placed at an adjustable desired height every 10 cm.

Allow uniform cooling of the goods even on the underside.

Furthermore:

The most widespread construction and assembly system. The most widely used and most widely used assembly system. No tools needed.

Simple and short calculation of the dimensions and price of each rack for the inside of the chamber, on the back and both sides in «П» and «Г» shapes. Alternatively

you give us the internal dimensions and we send you the shelf plan and price directly.

Fixed construction. They do not need support on the sides of the chamber, they are self-supporting.

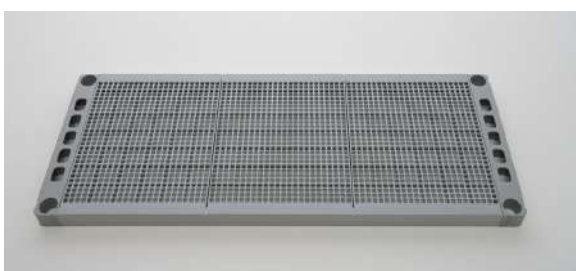

Surfaces with HACCP, NSF, CATAS certification suitable for food contact.

Specially designed for food preservation and storage in super markets, kitchens, restaurants, butchers and suitable for contact with poultry, cold cuts, cheese, pasta, pastries etc.

Available in widths of 30,40,50,60 cm, and heights of 1,60m, 1,80m, 2,00m

You can combine shelves of any width according to your needs.

DETAILS

Aluminium and plastic cold room shelves

In addition to storing products, amp shelves meet all strength requirements, while meeting hygiene and aesthetic specifications, providing ease of assembly.

Certified shelves with durability

Amp cold storage shelves are made of aluminium and consist of very durable plastic shelves, certified by the NSF. Therefore they are sanitary suitable for the storage of food.

The uprights are made of 35 mm anodized aluminium tube (anodized 20 µm thick) in a round shape and offer the possibility of creating shelves every 100 mm.

It is also possible to order with wheels.

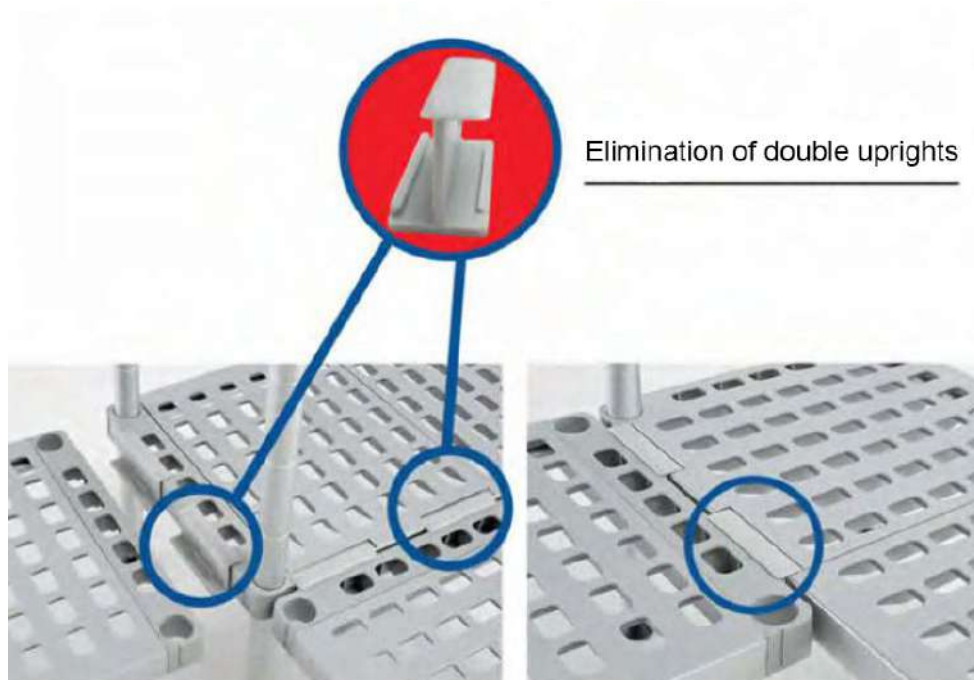

LAYOUT

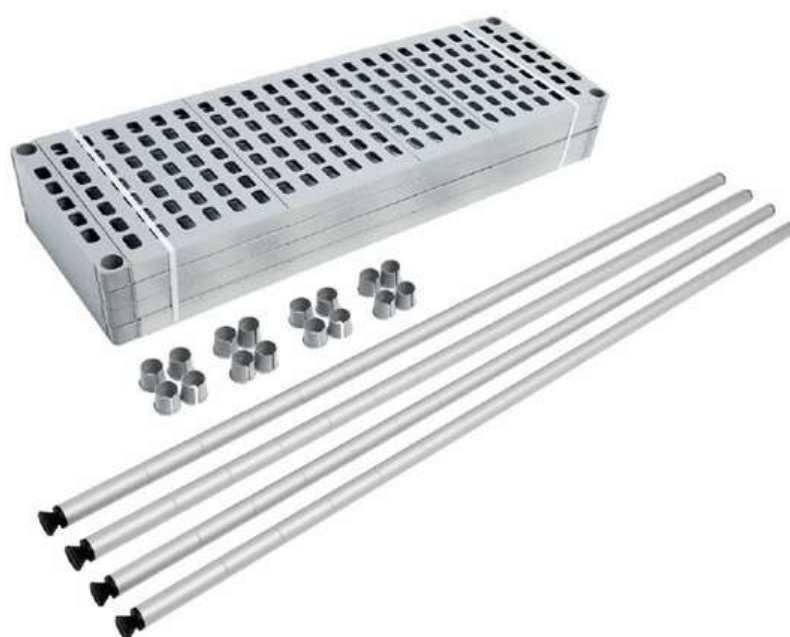

Fewer uprights - columns

An additional important advantage of AMP cold storage racks is that corner cold storage racks are achieved to save storage space.

Easy to assemble - Machine washable

Another important feature is the ease with which the shelves can be assembled, so no special technical skills are required.

Shelves with HACCP / NSF / CATAS certification

AMP cold storage shelves have the necessary certifications and are suitable for all applications, including those for food as they meet HACCP specifications.

They are also certified with NSF INTERNATIONAL.

Suitable for use in kitchens, clinics, restaurants and hotels

The amp mounted shelves are used in cold rooms and warehouses in health care establishments.

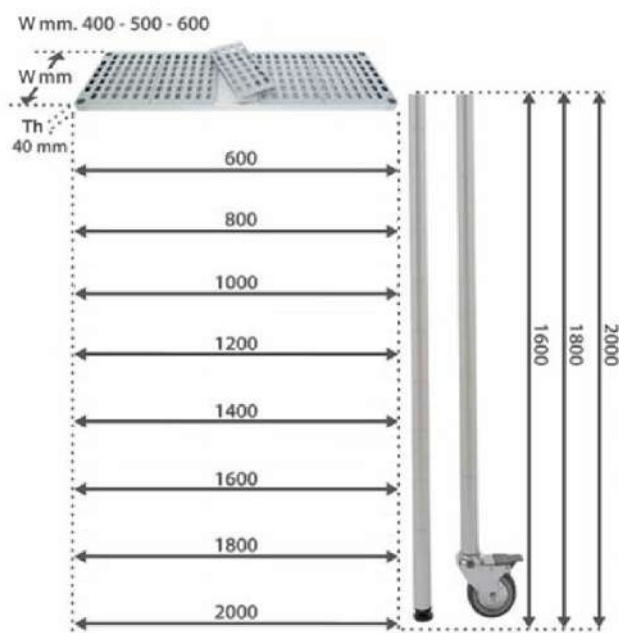

FLEXIBILITY

Flexibility in the dimensions of the shelves (Figure Γ, Figure Π)

The cold storage shelves are available in three different lengths : 1600 mm, 1800 mm and 2000 mm, eight different lengths: 600 mm, 800 mm, 1000 mm, 1200 mm, 1400 mm, 1600 mm, 1800 mm και 2000 mm, as well as four different widths : 300 mm, 400 mm, 500 mm and 600 mm.

We can create a Π or Γ shelving system when the different shelf sizes are joined together.

In fact, these shelves provide flexibility, and this is achieved with each joint to create the appropriate geometry that best suits the specific needs of each cold room, warehouse.

Uprights made from 35mm thick tubular aluminum with the possibility of adjusting shelves every 100mm

Our products are constructed in our modern facilities in Kryoneri Industrial Area, Athens, in compliance with German DIN standards of Berlin Technical University & HACCP specifications.
